

Our Grant Charitable Services

How it works

The organisation is split into 3 different divisions, to ensure it is run in an efficient manner.

1. Donors & Fundraisers

We enrolled a team of fundraisers to generate pledges from donors on a weekly or monthly basis. The fundraisers work to reach a specific goal before it is moved to the community.

2. Case Workers

Communities have a hand-picked team of well-trained Case Worker who are trusted individuals, dedicated to checking the eligibility of families facing poverty. Our Case Workers discuss the financial situation with each prospective recipient and agree the level of regular support they can receive.

They then hand them over the application forms, assist in completing them, and suggest to our trustees the support they recommend based on the individual circumstances.

The case worker is in constant contact with the recipient and they adjust their recommended donation according to their assessment and understanding of the recipient's needs.

Eligibility: Each applicant must complete the charity grant application form and provide all relevant documentation to support their application.

3. The Charity

The donor does not choose to whom to give the donation & the recipient does not know by who the donation was given.

The recipient is given a Quantum debit card which can only be used for essentials or day-to-day expenses. We monitor the usage of the funds to ensure its used appropriately to ensure the money is not spent on luxury and extras.

All information is kept strictly confidential.
